A Leading B2B Marketplace for Plastics Industry

Global Leader in B2B Service

ABOUT US

Plastics Technology is the pre-eminent (Business to Business) B2B marketplace that unites buyers, sellers, manufacturers and service providers globally. We strive to deliver success to our clients with cutting edge marketing and promotional campaigns for optimum market reach result in gin effective lead generations and business

Brands who trust us

WHY WE

We are poised to be a one stop shop for all B2B product promotions associated with various industrial segments. Our deep understanding of market movements, customer perception and optimum campaign design come clubbed with –

Salient Features

1. A vast and penetrative industrial database.
2. Dedicated teams for lead generation.
3. Custom campaign designs for optimum ROI.
4. Social Media networks with thousands of followers.
5. Dedicated team of content and copy writers.

OUR SERVICES

We are a professional B2B marketplace for industrial manufacturing sector. Our vision entails bringing all the manufacturing entities together and offer a fair business ground globally.

To achieve our goals, we have a whole gamut of service portfolio to offer to our esteemed partners –

1. Exclusive company profile with unlimited product display and technical specification sections for our partners;
2. Regular Email Blasts for product promotions;
3. Banner, Video and Content Promotions for lead generation;
4. Highly potent social media promotions by dedicated team;
5. Event promotions – for enhanced exhibitor sign ups;

Yorkers Trade & Marketing Service Co., Ltd.

WELCOME MESSAGE

Dear Exhibitors and Visitors,

On behalf of Yorkers Trade & Marketing Service Co., Ltd., it is my great pleasure to welcome you to CIMIF – the Cambodia International Machinery Industry Fair and CTG – the Cambodia International Textile & Garment Industry Exhibition, taking place from August 6–9, 2025 at the Diamond Island Convention and Exhibition Center in Phnom Penh.

As one of Southeast Asia's fastest-growing economies, Cambodia is emerging as a dynamic manufacturing hub, driven by a young workforce, strategic location, and growing foreign investment. With strong government support for infrastructure, SMEs, and digital transformation, the country is poised to lead in high-value, tech-enabled, and sustainable manufacturing.

Returning after nearly six years, CIMIF & CTG 2025 will host over 200 leading exhibitors from 15 countries and regions, offering a one-stop platform for sourcing and networking across textile machinery, apparel accessories, plastics, packaging, printing, auto parts, and agricultural equipment.

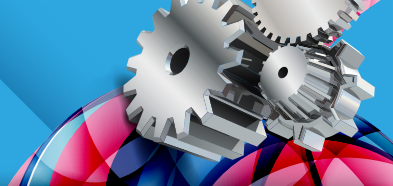

This year's shows will showcase smart manufacturing, green production, and cutting-edge machinery, along with professional seminars and panels co-hosted by key ministries and industry leaders — all focused on industrial sustainability and Cambodia's evolving role in the global supply chain.

At this pivotal time, CIMIF & CTG 2025 are ready to foster partnerships, empower industry players, and drive the next phase of Cambodia's industrial transformation.

Thank you for your participation. We wish you a productive, successful, and rewarding experience.

Judy Wang
President

Yorkers Trade & Marketing Service Co., Ltd.

Company Services

We provide maintenance and repair services by our expert technicians that will find the best solution to solve the problem for you! Services include:

Our Comprehensive Services

- Free Design and Consulting services for our storage racking system
- We provide installation and dismantling of racking services
- We install and warranty all our products sold from 1 - 10 years
- We have our "Maintenance Team" to stand-by for providing "After-Sale-Services" at all time
- We conduct seminars and training on product knowledge to our customers
- Conveyor belt systems designing
- Comprehensive repair & maintenance service for forklift
- Solution provider for increasing productivity and quality in the Food Processing & Logistics industries in the area of digital weighing technology

Products

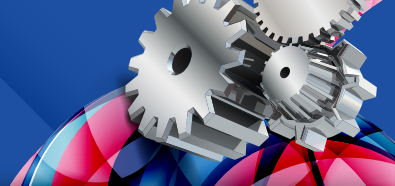

AAP Group Company Limited was incorporated in Phnom Penh, Cambodia in 1999 to provide "More products" for overseas suppliers and investors exploring Cambodia's nascent market place. The Company focuses primarily on promoting advanced technology, and major infrastructure projects to Cambodia's government agencies and private enterprises. AAP Group also conducts market studies, and provides market intelligence and conducts research for potential investors. The company is 51% Cambodian-owned and 49% Singaporeans-owned, and is privately help. AAP's office is located at # A9, A11, A13 Street 271, Sangkat Tumnob Tuek, Khan Chamkar Mon, Phnom Penh, Kingdom of Cambodia.

AAP GROUP COMPANY LIMITED started from Road Construction, then supply asphalt emulsion for Road Constructions after which, it became Agent for many international brands such as Tensar (UK), Sandvik (Sweden) on rock drill tools, Putzmeister (Germany) Concrete Pumps, Liebherr Tower Crane (Germany), Ohaus Digital Scale (USA), Yale lifting Equipment (Italy) etc We manufacture Truck Scale and Industrial storage system, conveyor system, rollers, trolleys, stacking containers, pallets, ladders etc.

Added Service:

We sell plastic pallets, baskets, containers etc.

Main Distributor: Yale Fork lifts Equipment, Mettler Toledo.

Guangdong Yuexin Environmental Protection New Material Technology Co., Ltd. (founded in Guangzhou in 2020) specializes in the R&D, production, and sales of new eco-friendly materials. Its main businesses include Corrugated Plastic Sheet, re-usable packaging box production & sales, and the supply of hollow sheet production, processing, and recycling equipment. The company brings together professional teams in chemical engineering, polymer materials, packaging design, and other fields. Equipped with advanced, complete sets of new sheet production and testing equipment, it maintains strict quality control. It was awarded the provincial High-Tech Enterprise certification in 2023, continuously meeting the differentiated needs of global customers.

A 5000 m² high-tech intelligent manufacturing base supports ten-thousand-ton capacity, with the entire corrugated plastic sheet chain equipment self-supplied.

11 intelligent heavy-duty equipment units stand ready! Creating an annual green miracle of 20,000 tons, from granules to precision-engineered boxes.

Products

Stone Plastic Composite Corrugated Sheet & Box

Lightweight & High-Strength: Low density, high mechanical strength.

Weather & Chemical Resistance: Excellent anti-aging and corrosion resistance.

Protective Properties: Waterproof, moisture-proof, flame-retardant, sound-insulating, and heat-insulating.

Hygienic & Safe: Complies with health and safety standards, non-toxic and eco-friendly.

Appearance & Sustainability: Rich colors, recyclable.

4. Technical Support
5. Training
6. Spare parts supply
7. Audits & Maintenance

Products

ASB is the world leader in one-step injection stretch blow molding technology with their unique 4-stations design. ASB latest Zero Cooling technology offers the advantages of faster production cycle time and improve container quality which is ideal in meeting the demanding requirements of the present packaging industry. The ASB Series can mold bottles or jars in PET plus more than 20 different plastic materials while providing extreme flexibility on container design including handless, non-round necks, off-center and tilted necks, premium glass-like cosmetic or space-saving stackable containers. Customized models can also provide specialized techniques such as double-layer, multi-layer molding, or hot-fill container up to 95 C to provide advanced aesthetic or technical qualities. All models feature dedicated energy saving features that further protects earths resources while contributing to enhanced profitability for the user.

Company Services

Based on market orientation and technology, we has vigorously designed and developed new products since it established.

With professional designers and production engineering technicians, we are specialized in producing full-automatic four stations plastic thermoforming machines, plastic lid forming machines, plastic vacuum forming machines, especially for making PLA & transparent PP package products. We seek for continuous innovation and development by integrating the stability and superiority of European technology, and take the customers' actual needs as the core designing concept for a long time, which improved our designs day by day and made our designs more effective and stable.

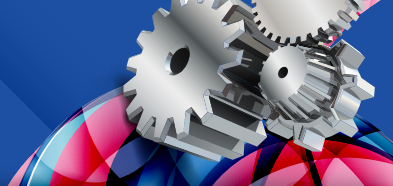

As a comprehensive company, we collect all the knowledge and resource and serve our customers with complete solutions in our area of plastic industry in order to create more economic value and offer the one-step service. We have passed several quality certificated systems and CE safety certificated system, and pay high attention to the new product innovation with rich technology and capital resource. We design and develop at least one set new machine each year. Our machines have been widely used in many countries, such as Germany, France, Albania, Poland, Macedonia, Chile, Argentina, Ecuador, Middle East, Middle Asia, Southeast Asia, Africa and etc. We think it is the only way

Products

Guangdong Hongxin Textile Co., Ltd. (founded 2002) operates a major factory in Zhangjiagang, Jiangsu. This facility boasts a daily yarn output of 50 tons, supported by 200 advanced bobbin winders and 300 high-efficiency spinning machines running 24/7. Its integrated dyeing factory features over 1,000 dyeing machines, processing 60 tons daily. Additional equipment includes 300 computerized raising machines and 100+ winding machines, forming a mature production chain.

The company specializes in producing viscose blended yarns, 100% acrylic yarns, acrylic blends, feather yarns, and 100% polyester yarns. Its headquarters and a 6,000+ sqm warehouse are located in Dalang Town, Guangdong - a major wool weaving hub. The warehouse stocks over 3,000 tons of spot goods, with ample inventory per color (>200 tons for yarns).

Having focused on domestic sales for nearly 20 years with a commitment to quality, Hongxin leveraged its production strength in 2023 to establish a foreign trade team. While maintaining domestic market stability, it actively pursues global expansion. Through international yarn exhibitions showcasing yarns and knitted garments, Hongxin now exports successfully to over 30 countries worldwide, including Turkey, Japan, the USA, Brazil, South Korea, and Russia.

Company Services

Established in 2003, MF GROUP stands as a leading textile fabric manufacturer with an impressive production setup. Boasting 10 dyeing machines, 12 printing lines, and 4 digital direct - injection printing machines, we specialize in producing high - quality cotton and rayon fabrics. Our clientele includes renowned global brands such as GEMO, PEPCO, SHEIN, LPP SA, INDITEX (ZARA), CARRY, MAX, NEXT, and NEWLOOK.

Our unwavering focus on the textile fabric industry has enabled us to carve out distinct competitive edges. First, quality is at the heart of everything we do; each fabric roll undergoes stringent quality control. Second, our streamlined production processes allow us to offer highly competitive prices without compromising on quality. Third, with efficient production management, we ensure quick turnaround times to meet urgent deadlines. Finally, our dedicated customer service team provides personalized support at every stage, from order placement to delivery. Partner with MF GROUP and experience excellence in textile fabric manufacturing.

Products

Our woven fabric range offers top - quality materials. Woven dyed and printed fabrics feature vivid colors and patterns, great for standout fashion. Woven embroidered fabrics blend fine embroidery with sturdy weaves, adding elegance to garments.

We have woven rayon, prized for its softness and drape, perfect for dresses and shirts, and woven cotton, known for breathability and durability, suitable for shirts and trousers. Our collection also includes dedicated fabrics for dresses, shirts, and trousers, ensuring quality and style for your designs.

Company Services

Textile (China Thailand) - A modern manufacturer specializing in high quality polyester knitted sports fabrics, with more than 30 years of industry experience, with double-sided interlocking fabric as the core advantage, products are exported to Southeast Asia and global markets. The company is equipped with over 300 advanced circular machines, enabling an integrated production process from spinning, weaving to dyeing and finishing. With an annual output exceeding 100,000 tons, it can meet the diverse needs of sports apparel, yoga wear and outdoor gear. Leveraging a dual-base layout with a Chinese headquarters + Thai warehouse center (with over 5000m² of spot inventory in Thailand), we ensure rapid response and flexible shipping, providing customers with efficient and stable supply chain support. We have been deeply engaged in technology research and development, continuously launching functional fabrics with hygroscopic, quick-drying, antibacterial and UV resistant, environmental protection and regeneration (rPET) functions and passing international environmental protection certification (such as OEKO-TEX®, GRS) to help global sports brands enhance their product competitiveness.

With the purpose of "professional weaving, accurate delivery", Textile is becoming a trusted partner in the field of international sports fabrics.

Company Services

Suzhou Ju'an Textile Co., Ltd. was founded in 2005, in China. Yangfan brand was registered at the same time. As an industry-leading manufacturer that integrates the development, production, operates and sales for textile threads, we started out producing thick embroidery threads. With advanced production equipment, our dyeing capacity is up to 1 million kilo each month, and output is 1.5 millions cones each month. Our yield has reached 150 millions so far. We are following the international testing standard and environmental protection concept throughout, OEKO-TEX Standard 100-Annex 6 Baby. With a professional and experienced R&D team, we can meet our customers' requirements for the threads from colors to structures. One of our key competitive advantages lies in our ability to provide a one-stop production service. From the initial design and development stage to the final production and delivery, we manage every aspect of the manufacturing process in-house. Ju'an team is always preparing fully to give the best service to our customers. Comprising dedicated professionals from various fields, including production, quality control, sales and customer service, each member is committed to providing the highest level of service to our customers. We believe that building strong, long and lasting relationships with our clients is the key to our success.

Products

We are specializing in produce of sewing thread, wool embroidery thread, acrylic embroidery thread, polyester embroidery thread, viscose embroidery thread, special thread with metallic yarn and various rope&cord&tape.

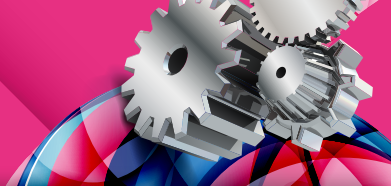

Regular yarn size has :

10NM/1, 13NM/1, 24S/2 acrylic embroidery thread, which are mainly applied for chenille embroidery. Thereinto, the size 24S/2 also can be used for flat embroidery. All of that are soft touch like wool and obviously 3D appearance.

32S/2 acrylic embroidery thread, which is a good alternative to the application of cotton embroidery thread. You can use this to handle some more detailed patterns, exquisite and soft. 42S/2 acrylic and wool blended embroidery thread. The birth of this kind of embroidery was to cater to high-end products. It combines superior texture with the requirements for mass production together.

26S/2, 36S/2 velvet thread, which are highly sought-after. Their super fluffy texture gives embroidered and knitted items a plush and sumptuous look, which has earned them deep affection from our customers in the embroidery and knitting industries.

We are following environmental protection concept and the international testing standard (OEKO-TEX Standard 100-Annex 6 Baby) throughout. With an experienced R&D team and strict quality testing, we can provide customized products with quality guarantee to match our customers' requirements as possible as we can.

Qianglong Machinery Co., Ltd. is one of the national high-tech enterprises, mainly specializing in designing, developing and manufacturing flat knitting machines. The company locates in the New & High tech Industrial Area in Tongxiang, which holds the World Internet Conference every year. Qianglong Industrial park covers an area of over 60,000 square meters and 90,000 square meters of office and production buildings. Based on independent innovation and considerate service, Qianglong has provided clients with high-tech and qualified products and customer-oriented service for decades.

To meet customers' various demands, we set up multi-functional computerized flat knitting machines such as "Qiangsheng" & "Qianglong". Qianglong has established a comprehensive marketing network and after-sales service system. While keeping the principle of "People-oriented, Sincere service, Technology promotes developments, and Service creates brands" in mind, Qianglong devotes itself to enriching cultural connotation, enhancing products' value, expanding market share and achieving its Qianglong vision.

Products

In terms of product research and development, Tongxiang Qianglong is market-oriented and constantly develops products that meet the needs of different customers. At present, the company has developed a series of computerized flat knitting machines including single system, single-double system, double system, triple system, full garment, 3D shoe upper computerized flat knitting machines, etc. Each product has its core technology and unique functions.
